

# Air Conduction

Tiny "TUCKAWAY" receiver is tucked in your ear and held in place by a plastic eartip molded to fit your ear.

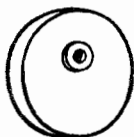

Fig. 2

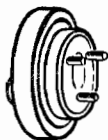

Fig. 3

Fig. 4

## HOW TO CONNECT RECEIVER

Note nub on flat side of receiver (Fig. 2); three small pins on other side (Fig. 3); three small holes inside plastic cap at one end of receiver cord (Fig. 4). When cap fits over receiver, three small pins will fit in three small holes.

1

In one hand, hold cap so that receiver cord hangs straight down. In other hand, hold receiver with pins facing cap and nub facing you.

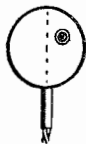

Fig. 5

If you wear receiver in right ear, press receiver into cap so that nub is to right of cord (Fig. 5).

Fig. 6

If you wear receiver in left ear, press receiver into cap so that nub is to left of cord (Fig. 6).

Fig. 7

If you press receiver into cap so that nub is in line with cord (Fig. 7), receiver won't work.
