

THE ELEGANT
ENVOY

The smartest new shape in hearing aid design. So slim and lightweight, it offers wearing possibilities seldom found in conventional aids. Optional barrette enables women to wear it in their hair, men can wear it behind their necktie with optional tie bar. The Envoy's transistorized circuit delivers brilliant tone, traditional Zenith dependability. Top-mounted microphone receives sound from any angle and reduces annoying clothing sounds. Side-mounted fingertip volume control, plus a combination two-position tone control and on-off switch, are added convenience features.
