

THE SUPER-POWERED  
**REGENT<sup>®</sup>**

Specifically designed for the person with a really severe hearing loss. Though smaller than many, the Regent delivers 30-40 times the electrical power output of the average aid. Its super-powered circuit with five transistors and two transformers produces amazing range and clarity. This smartly styled conventional aid, weighing less than 3 ounces with battery, also features a combination on-off switch and volume control, plus an exclusive four-position power regulator switch for progressive hearing losses. See and test the Regent today!
